

Keeping Up and Keeping Connected as a Family

Cyndie, a mom of two in North Carolina says Discord is always open on her computer. With her two sons out of the house, Discord helps Cyndie and her family communicate effectively and coordinate plans.

"We use the channel to hash out schedules, which restaurant we should eat at, and to coordinate our lives. My younger son doesn't have a car on campus, so we use it to coordinate who is in charge of pickup duty," Cyndie says.

Cyndie's oldest son created their server on Discord as a better means for communicating as a family. All four family members use one general channel and everyone has Discord installed on their computers and phones making it easy for them to stay connected.

"Discord is so much better for us when making plans than all thumbing with text messages," Cyndie said.

***Discord is so much better
for us when making plans
than all thumbing with
text messages.***
